Raw Overhead Flight-Trajectory Comparison

Pilot: Driver · Lean 5° · Curve ×2 · Shaft Twist SD 2°

Protocol: driver-control-speed-bounds/1 | Stage: 32-Shot Pilot; No Final Inference | Population: Saved Raw Trajectories; Not Paired by Shot Index | Paths shown: Straight 6; Draw 6; Fade 6

Illustrative Simulation • Assumed Head Properties • Carry Only. Raw trajectories; no aim-line rotation. Vertical display magnification: 4.1× versus downrange. Only the displayed paths are plotted; paths are sampled from supported airborne shots.
